## General Comment

this agency cannot and should not be trusted in any way. it does not protect america. it protects oil profiteers. these are the same employees who partied with oil profiteers and took bribes from them. none of those employees have been fired although they caused the gulf of mexico huge oil debacle with bp. we need new personnel not such corrupt, crooked employees at boemre. do not trust this agency to protect america. they will drill anywhere no matter whether there is any way to clean up or not. we need a new agency that is honest. this one is not. they are both stupid, bribe taking and willing to hurt america.
