## General Comment

Dear BOEMRE,

Please accept my comments on the proposal to revise regulations regarding non-competitive acquisition of an Outer Continental Shelf (OCS) renewable energy lease.

I urge you to reject the proposed rule.

I believe the proposal needs a reasonable and thoughtful review of the impacts of those projects on the environment, economy and coastal stakeholders.

This is clearly not the case of the proponent-driven review of the Cape Wind project.

The proposal needs to go through a thorough compete process in order to best serve the public's economic interests. In addition, the public review process to ensure the public's input would be greatly marginalized.

Please reject this rule.

Sincerely,

Byron Cargill, Ph.D.
