Organization: Self

General Comment

This is a common sense change to regulations. The capital requirements to complete one of these projects and submit a proposal is a long process. If on first offer only one company submits a proposal there is no need to submit to a second round of inquiries. Competition was allowed in the first lease option and only one company determines it is financially viable then they should win the contract. This rule will not wave environmental review that is necessary for this type of project but allow for increase speed and efficiency in government operations, a goal all should wish for.
