General Comment

Dear BOEMRE,

Although I support consensus-based renewable energy development, I am opposed to the rush to construct renewable energy projects at any cost. We deserve a reasonable and thoughtful review of the impact of such projects on the environment, economy and coastal stakeholders.

Please reject the proposed rule, which would discourage competition, while marginalizing the public review process.

This is clearly seen in the case of the proponent-driven review of the Cape Wind project.

Respectfully submitted,
Patty Dineen
